EDUCATION:

The Ohio State University | Columbus, Ohio

Graduating, August 2026

- Honors BS Computer Science and Engineering Major & Business Minor

US Citizen

WORK EXPERIENCE:

Visa

May 2026 - August 2026

Incoming Software Engineer Intern

Foster City, CA

Citizens Financial Group & College Raptor

May 2025 – May 2026

Software Engineering Intern

Columbus, OH

- Built scalable Android and iOS features with Java, Swift, REST APIs, improving reliability and workflows for 500+ students.
- Developed ASP.NET Core + MySQL backend services with authentication, logging, and validation, securing data for 1,000+ users.
- Trained Python forecasting models with regression and boosting, cutting runtime 90% and improving analytics accuracy.
- Built a Streamlit + AWS (Redshift, Snowflake, SageMaker) platform delivering real-time analytics for \$1.5M+ decisions.

Ohio State EED

August 2023 - Present

Engineering Teaching Assistant/Software Engineering Assistant

Columbus, OH

- Built a Node.js + Vue full-stack online robotic store platform for 100+ students, wired with MySQL, AWS Lambda, S3 services.
- Led system design, SOLIDWORKS prototyping, and CI/CD integration, connecting hardware and software across projects.
- Taught MATLAB, C/C++, and OOP, emphasizing debugging, unit testing, and system-level problem solving.

M&T Bank

June 2024 - August 2024

Software Engineering Intern

Buffalo, NY

- Rebuilt a SAS-based credit loss engine using Python + SQL, improving performance, reproducibility, and ETL efficiency.
- Developed a Vue 3 frontend + ASP.NET Core backend to enhance observability and reduce support resolution time.
- Proposed a modern microservices architecture, replacing legacy tooling, driving \$2M+ annual cost savings and improved scalability.

PROJECTS:

GrantPilot: AI Grant Readiness Assistant *FastAPI | Next.js | TypeScript | Claude API | RAG | Postgres | MCP | Playwright*

- Built AI grant eligibility platform for nonprofits with RAG pipeline, deterministic scoring bypasses LLM calls, cut analysis latency by ~60%.
- Shipped auth, PDF reports, and an MCP server for Claude agent workflows, validated across 203 backend and 35 MCP integration tests.

AI Valve Position Detector: TE Connectivity AI Cup *Scikit-learn | Pandas | NumPy | Matplotlib | Parquet | Kalman Filter*

- Developed Kalman filter + residual regression pipeline to estimate valve angle with $<0.1^\circ$ MAE across 10k+ high-frequency IMU samples.
- Engineered IMU-based features and trained Ridge and Random Forest models to correct sensor drift and magnetic distortion.
- Built an end-to-end evaluation pipeline with time-series validation and visualizations, improving robustness for scalable industrial monitoring.

SymphoniConnect: Symphonic Pioneers *React | Firebase | WebRTC | TypeScript*

- Developed a React + Firebase WebRTC platform enabling secure, real-time mentoring sessions and identity-driven collaboration features.
- Added matching and scheduling features with improved UI flows that increased reliability and streamlined communication for 50+ users.

Climate Risk Platform *Transformers | XGBoost | SHAP | Kubernetes | FastAPI | Redis | MLflow*

- Built a spatiotemporal forecaster producing 72-hour, 1-km risk maps using Python-based ML pipelines and reproducible model tracking.
- Deployed FastAPI + MLflow on Kubernetes to enable controlled rollouts, nightly retrains, and hardened pipeline reliability.

SKILLS:

- **Programming Languages:** Python, TypeScript, JavaScript, Java, C++, C, SQL, Bash
- **AI, LLM & Product Systems:** LLM workflows, embeddings, prompt engineering, model integration, evaluation pipelines, experimentation
- **Full-Stack & Data Systems:** React, Node.js, REST APIs, relational databases, scalable systems, CI/CD, product prototyping
- **Relevant Coursework:** Systems I and II, Distributed Systems, Databases, Data Structures, Algorithms, Computer Architecture

EXTRA-CURRICULAR ACTIVITIES:

Fundamentals of Engineering Honors – Web Development & Construction Team – Team Leader *August 2023 - Present*

- Developed Full Stack services for an online store accessible to robotics students, with 24/7 support for troubleshooting and deployment.
- Built store UI with React, event and callback handling using AWS, and back-end communication with SQL Server.
- Designed the robot course for a competition with over 100 students participating each year.
- Guided new Teaching Assistants with SOLIDWORKS and Adobe Illustrator to build and print new physical task models.
- Led a sub team to model the next year's robot course aesthetics and electronics through iterative design process and collaboration.

Carnatic (South Indian Classical) Flute and Vocal Music - Flautist

August 2009 - Present

- Commercially playing flute for concerts and performances since 2022.
- Featured performances in Pittsburgh, Cleveland, Columbus, as well as cities in India.
- Awarded Master Title in Vocal by the Brinda Repertory
